Norfolk LCT Update

NPDL is excited to announce that after several months delay the Norfolk has finally been delivered at Sibuluan Malaysia. Our crew are onboard and preparing to sail today, Thursday 15th of June. The positioning voyage to Auckland is 28 days, weather permitting.

The Norfolk has been prepared specifically to meet the unique shipping needs of the community over the long term. To allow unloading at the anchorage, she has been fitted out for a deck stowage of 36 TEU, with forward and aft void deck space for onboard devanning of containers. Cargo handling machinery onboard includes two low beam forks and 2 Hiab cranes, each with a 6tonne lift capacity. For lifting cargo to lighters the low freeboard is an improvement on safety. Should in the future the port development project proceeds the vessel has a low draft and forward ramp for a roll-on-roll-off operation.

We understand that there is a significant backlog of cargo. A further trade notice will shortly follow this message with details on receipt windows and packing requirements.

For schedule details please visit our web site www.npdship.com/schedules/

The NPDL and Transam team look forward to being of service to you.

Sincerely,
NPDL
