MICROPAC & INTRAPAC – Phase-in of ICS Silver Lining and redeployment of Southern Pearl

Dear Valued Customer,

We are pleased to advise of our plan to phase-in the **ICS Silver Lining** to our MICROPAC service and redeploy the **Southern Pearl** to our INTRAPAC service. This follows our fleet expansion announcement on 5 October, which you can view [here](#).

To facilitate this smooth transition, the phase-in schedule will be as follows:

- The **Southern Pearl** will phase out of MICROPAC following the completion of **Voyage 2609**. She will then redeploy to INTRAPAC from **Voyage 2613** on 17 December 2026 at Lautoka.
- The **ICS Silver Lining** will phase into MICROPAC from **Voyage 2610** on 8 December 2026 at Lautoka. This voyage will include an additional Kiritimati (Christmas Island) call.
- The **Capitaine Wallis** will phase out of INTRAPAC following the completion of **Voyage 2612**. She will then remain in our fleet to enable operational flexibility, cover project cargo, and provide additional capacity.

The **ICS Silver Lining** will be sailing to the Central Pacific via Australia and New Zealand before joining MICROPAC, creating opportunities to accommodate project and breakbulk cargo. If this is of interest, please contact your Neptune Pacific representative or find your local contact details [here](#).

The updated service schedules are as follows on the next page:
